

COMMERCIAL SUNROOM PRODUCTS

A Division Of Patio Enclosures, Inc.

Jefferson High School
Cedar Rapids, Iowa

Faced with a decision of how to bring in an abundance of natural light, the design team for the school district engaged the assistance of C.S.P. to engineer, manufacture and install this custom skylight. Studies have indicated natural light elevates moods and improves classroom performance.

The custom designed gable skylight incorporates high performance glazing with state of the art thermally broken aluminum structural framing. The large glass endwalls uniquely add much desired light.

The flexibility of C.S.P.'s design and engineering, combined with precision manufacturing and installation by company employees, makes C.S.P. the right choice for your next skylight project.

C.S.P. the recognized leader in structural skylight applications.

The building features are:

- Extruded aluminum framing
- Maintenance free finish
- 1" Insulated, Dual Sealed Low E Glass
- Installation by company employees
- Turnkey Services
- Venting ridge windows

The Commercial Division of Patio Enclosures, Inc. will solve your space needs.
