

COMMERCIAL SUNROOM PRODUCTS

A Division Of Patio Enclosures, Inc.

Slippery Noodle Inn, Indianapolis, IN

When one of the oldest blues lounge and dining establishments in the country desired to expand their patron capacity, they called upon the professional team at C.S.P. to provide a curved eave Solarium.

Blending with the buildings architectural history, the new Solarium was the perfect solution to add additional space required by the increase of loyal customers. This two story mounted Solarium provides an enormous amount of natural light, creating an atmosphere of relaxation and fun for both employees and customers.

The design of the Solarium incorporates many unique features that insure the image of a highly visible public facility. The connection to the existing structure fully integrated the Solarium to give that "always been there" feel, not simply an addition.

The building benefits are:

- Custom design
- 1" insulated bronze glazing throughout
- Solar cooled, tempered roof glazing
- Installation by certified employee owners
- Bronze aluminum, duracron/polycron finish
- 14' clear height at ridge
- Turnkey services

The Commercial Division of Patio Enclosures, Inc. will solve your space needs. Contact us for more information or to obtain our CD Rom.
