

COMMERCIAL SUNROOM PRODUCTS

A Division Of Patio Enclosures, Inc.

Wickliffe High School
Wickliffe, OH

Common to educational facilities throughout the country, is the need to provide cost effective additional space, that promotes and nurtures an ideal learning environment. The administration at Wickliffe High School sought out the team of **C.S.P.** to provide the glass solarium addition. They recognize that natural light improves student performance and enhances the aesthetics of new and existing facilities.

The solarium allows large volumes of natural light into the learning space affording nature's stimuli to keep both teacher and students energized and productive during the learning session. Studies have suggested that natural light improves visibility and accuracy; improves light quality, making colors more vivid; and improves moods, increasing attention spans.

Don't simply increase your expenses with an addition...make a lifetime investment in your student performance...provide them a quality glass solarium by **C.S.P.**

The building features are:

- Custom design
- Installation by factory trained, certified employee owners
- 1" Dual Sealed, Laminated Insulated Glass
- Clear Anodized Aluminum Finish
- Sidewall and roof ventilation
- Custom awning vent windows
- Full turnkey design and engineering

The Commercial Division of Patio Enclosures, Inc. will solve your space needs.
